

SAFER. MORE PRECISE. 6-AXIS COBOTS

Doosan's versatile range of 6-axis collaborative robots offer the industry's best collision sensitivity making them among the safest cobots available.

Increased Flexibility and Operation

From heavy lifting (up to 55 lbs) to assembly, finishing and food service fulfillment, Doosan's 6-axis cobots provide automated solutions for the widest variety of industries.

- + High-performance torque sensors on all 6 axes
- + Industry-leading safety and precision
- + Featuring light-weight cobots with highly versatile mounting possibilities
- + Precision with improved dexterity and efficiency

A Doosan Cobot for Your Needs

M-Series (Flagship): Known for its premium accuracy and six high-performance torque sensors.

H-Series (High Payload): Designed for heavy-duty tasks with the industry's highest payloads for cobots.

A-Series (Fast & Flexible): Focuses on superior speed and cost-effectiveness.

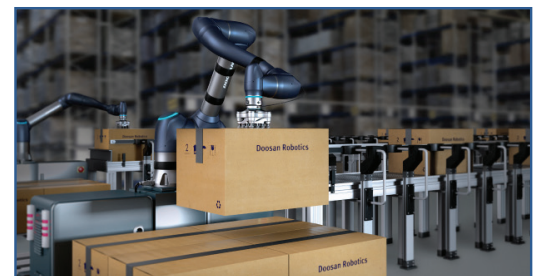

E-Series (Easy/Entry): Targeted at the food and beverage industry with NSF certification.
