

PLUG & PLAY PALLETIZING PALTZ

One of the most amazing solutions for manufacturers, distributors, packers and freight transporters, the amazing PALTZ system provides integrated, and automated palletizing from the conveyor of choice.

No Need for Programming or Calibration

From beRobox and Doosan, the PALTZ system includes STACKiT (a proprietary software), and when combined with the embedded skewed conveyor, the need for programming and calibration is eliminated

- + 40 – 70lbs capacity
- + 2 palletizing zones
- + From 60" up to 104" palletizing heights
- + 13" up to 15" touchscreen HMI
- + From 14 cycles/minute

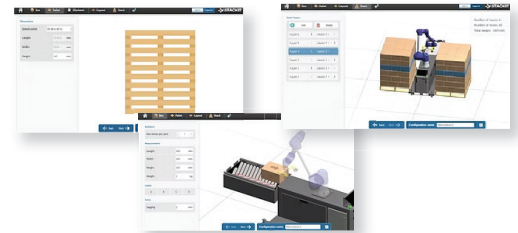

Improving Productivity. Addressing Labor Challenges.

PALTZ palletizers enable manufacturers to automate palletizing and depalletizing operations with minimal integration effort and maximum operational flexibility.

These systems are serving manufacturers across the world, helping them scale operations, improve productivity, and address labor challenges through accessible automation.

SEE MORE

STACKiT Software is the easiest-to-use palletizing software on the market with an intuitive touch-screen interface and fully customizable product configurations.

NEW STACKiT AI Vision offers adaptability to any PALTZ palletizers and makes depalletizing and repalletizing easier, smarter and significantly more adaptive to real-world conditions.
